LAB 3B: FEATURE ENGINEERING AND MODELING

In this lab, you will learn how to use R or Python to engineer or construct new features and build a machine learning model.

1. If you have not already done so, download the [Setup Guide](#) and follow the instructions to sign up for an Azure Machine Learning subscription, and install and configure the required software. You will also need to download and extract the [lab files for this lab](#).
2. After you have created an Azure ML subscription, follow the instructions in the [Lab 3B](#) document to complete the lab.

Note: The setup guide, lab files, and lab documents for this course are available in the **Handouts** section of the [Course Info](#) page.
