Module 5 Lab 10 - Reading in the Audio Files

0 Votes

discussion posted about 11 hours ago by [ndefalco](#)

Team - any insight on reading in the .wav files from GitHub? I've tried using:

```
sample_rate, audio_data = wavfile.read(filename),
```

but keep getting: IOError: [Errno 22] invalid mode ('rb') or filename

I've also tried downloading the files locally first, but there is no audio (get an 'Aborted' message in Edge and a crossed out Sound icon in Chrome).

Thanks for the help

Help

You need to clone the git repository, in Linux you need to run the following command (I guess that the windows app is similar):

git clone <https://github.com/Jakobovski/free-spoken-digit-dataset/>
