Audit Access Expires Sep 9, 2020

You lose all access to this course, including your progress, on Sep 9, 2020.

Upgrade by Jul 5, 2020 to get unlimited access to the course as long as it exists on the site. **Upgrade now**

Steve Yablo

Yablo in Person

Stephen Yablo is the inventor of Yablo's Paradox, and one of the most respected contemporary philosophers in the world. He is also a professor at MIT, so I convinced him to join my class and give a guest lecture about ω -sequences. The lecture is both super interesting and super accessible. I *highly* recommend that you have a look!

around the distinction that Quine draws that's very useful.

So you know about in general, there's

these weird situations where you have

some plausible-looking premises, and they

seem to imply something unbelievable

by valid-looking line of argument.

Quine draws a three-way distinction.

He says, first of all

he says, first of all, there's paradoxes versus antinomies.

So let me start with paradoxes.

Paradoxes come in two kinds.

A veridical paradox is a paradox where the
