Lesson Quiz

Answer the following questions to test your knowledge of the concepts and techniques taught in this lesson.

Question 1

1/1 point (graded)

Which of the following are **true** about bounding boxes?

Choose all that apply

☒ They record where objects are in an image ✓

☐ They record what the object classifications are in an image

☒ They are often crude approximations of the shape of objects in an image ✓

☐ They only contain pixels related to the object

Explanation

Bounding boxes determine where the recognized objects are in the scene or image, typical with an anchor (x,y) pixel coordinate (top left, for instance), and a width and height. Bounding boxes are crude approximations, and often contain lots of pixels not related to the object in question.
