Quiz: Cross Entropy Loss

Instructions for Graded Review Questions

How much time do I have to complete these questions?

Unlimited. You can take as long you want to answer these questions.

Can I go back to the videos to check something, then come back to these Review Questions?

Yes, absolutely! These questions are for you to review what you've learned so far. Take your time.

Do these Review Questions count towards my final grade?

Yes, all of the review questions, combined together, are worth 50% of your total mark.

How many chances do I get to answer these questions?

It depends:

- For True/False questions, you only get one (1) chance.
- For any other question (that is not True/False), you get two (2) chances.

How can I check my overall course grade?

You can check your grades by clicking on "Progress" in the top menu.

Multiple Choice

1/1 point (graded)

What is the advantage of the cross-entropy loss over the Mean Square Error?

☒ There are contours all over the cost or total loss surface; as a result, the algorithm will converge to a local minimum

☐ It's easier to implement

☐ It's less complex

Submit

You have used 1 of 2 attempts

✓ Correct (1/1 point)

Multiple Choice

1/1 point (graded)

What is the expression for the cross entropy loss?

☒ `out=-1*torch.mean(y*torch.log(yhat) +(1-y)*torch.log(1-yhat))`

☐ `nn.MSELoss()`

☐ `out=torch.mean((y-yhat)**2)`

Submit

You have used 1 of 2 attempts

✓ Correct (1/1 point)
