## Review Question

(1/1 point)

Select the three best applications of machine learning:

Getting computers to solve data driven problems

Using computers to solve tasks that involve fine tuning many parameters

Having the computer automatically grade thousands of multiple choice questions

When you have a lot of data to train a computer against

## EXPLANATION

Think back to the definition of machine learning, as presented in the reading and lecture materials. What type of problem is better for you to solve directly, rather than through machine learning?
