

**Microsoft: DAT203x Data Science and Machine Learning Essentials**

- ▶ Before You Start
- ▶ Module 1: Introduction and Data Science Theory
- ▶ Module 2: Working with Data
- ▶ Module 3: Visualization, and Building and Evaluating Models
- ▶ Module 4: Regression, Classification, and Unsupervised Learning
- ▶ Module 5: Recommenders and Publishing Your Work

**▼ Final Exam****Exam**

Final Exam due Oct 30, 2015 at 00:00 UTC 

**Post-Course Survey****QUESTION 8** (1/1 point)

You are preparing data to train a machine learning model. You want to use all applicable data to train the model, but you must ensure that variables with a wide range of numeric values do not dominate the training of the model.

What should you do?

☐ Remove numeric columns that contain a wide range of values.

☒ Scale numeric columns that contain a wide range of values. 

☐ Convert numeric columns with a wide range of values to string features.

☐ Clip the values of the numeric columns to replace the top and bottom 20% with the mean value.
