5.1.2 Exam: Identification of exact solution behavior

 Bookmark this page

Exams due Aug 30, 2023 05:00 IST Completed

Using our canonical notation for an Initial Value Problem (IVP) as described in Section 8.3.1, consider a scalar IVP for which,

$$f = \lambda u$$

(5.1)

where λ is a constant (independent of time and u).

Consider the plots shown in the figure below.

Problem: Identify the exact solution

4.0/4.0 points (graded)

Which line is a solution to the scalar IVP with $\lambda = 0.1$?

- ☐ orange
- ☒ blue
- ☐ green
- ☐ red
- ☐ None of the above

Which line is a solution to the scalar IVP with $\lambda = -1$?

- ☐ orange

☐ blue

☐ green

☒ red

☐ None of the above
