#### Question 2

6/6 points (graded)  
Determine the matrix  $A$  so that

$$A \begin{pmatrix} 0 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 2 \\ -1 \end{pmatrix} \quad \text{and} \quad A \begin{pmatrix} -1 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 3 \\ 0 \end{pmatrix}.$$

$A =$ 

<input type="text" value="0"/>	✓ Answer: 0	<input type="text" value="1"/>	✓ Answer: 1
<input type="text" value="-1"/>	✓ Answer: -1	<input type="text" value="2"/>	✓ Answer: 2
<input type="text" value="-1"/>	✓ Answer: -1	<input type="text" value="-1"/>	✓ Answer: -1

**Answer:**  $A \begin{pmatrix} 0 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 2 \\ -1 \end{pmatrix}$  so we know that the second column of  $A$  equals  $\begin{pmatrix} 1 \\ 2 \\ -1 \end{pmatrix}$ .

Now, we want to figure out what  $A \begin{pmatrix} 1 \\ 0 \end{pmatrix}$  equals. We notice that

$$\begin{pmatrix} 1 \\ 0 \end{pmatrix} = \begin{pmatrix} 0 \\ 1 \end{pmatrix} - \begin{pmatrix} -1 \\ 1 \end{pmatrix}.$$

Thus

$$A \begin{pmatrix} 1 \\ 0 \end{pmatrix} = A \left( \begin{pmatrix} 0 \\ 1 \end{pmatrix} - \begin{pmatrix} -1 \\ 1 \end{pmatrix} \right) = A \begin{pmatrix} 0 \\ 1 \end{pmatrix} - A \begin{pmatrix} -1 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 2 \\ -1 \end{pmatrix} - \begin{pmatrix} 1 \\ 3 \\ 0 \end{pmatrix} = \begin{pmatrix} 0 \\ -1 \\ -1 \end{pmatrix}.$$

Thus,

$$A = \begin{pmatrix} 0 & 1 \\ -1 & 2 \\ -1 & -1 \end{pmatrix}.$$
