### 5.2.3 Exam: Multi-dimensional gradient descent question

 Bookmark this page

Exams due Sep 27, 2023 05:00 IST   Completed

Consider the function

$$J(x,y) = \sin(2\pi x) + \cos(2\pi y)$$

(5.28)

with partial derivatives given by:

$$\frac{\partial J}{\partial x} = 2\pi \cos(2\pi x) \qquad \frac{\partial J}{\partial y} = -2\pi \sin(2\pi y)$$

(5.29)

A contour plot of this function in the unit square  $[0,1]^2$  is given here:

Problem: Interpreting the gradient

1.0/1.0 point (graded)

Consider  $\nabla J(0.6, 0.2)$ , the gradient of  $J$  at the point  $(x,y) = (0.6, 0.2)$ . We describe the positive unit  $y$  direction as "Up", the negative unit  $y$  direction as "Down", the positive unit  $x$  direction as "Right", and the negative unit  $x$  direction "Left".

In which direction is the gradient of  $J$  oriented at the given point?

- ☐ Up and to the Right
- ☐ Up and to the Left
- ☐ Down and to the Right

☒ Down and to the Left

## Problem: Computing a gradient descent step

2/2 points (graded)

Compute  $\mathbf{x}^{(1)}, \mathbf{y}^{(1)}$ , the point reached after performing one iteration of gradient descent with a step size  $\alpha = 0.02$ , and a starting point given by  $(\mathbf{x}^{(0)}, \mathbf{y}^{(0)}) = (0.6, 0.2)$ .

What is the value of  $\mathbf{x}^{(1)}$ ? Enter your answer as a float, to two significant digits

0.70166407

✓ Answer: 0.7017

What is the value of  $\mathbf{y}^{(1)}$ ? Enter your answer as a float, to two significant digits

0.31951329

✓ Answer: 0.3195

## Problem: Expected behavior after many steps

1/1 point (graded)

If we run the gradient descent algorithm with sufficiently small step size (like  $\alpha = 0.02$ ), and for sufficiently many steps (like  $N = 100$ ), starting from  $(\mathbf{x}^{(0)}, \mathbf{y}^{(0)}) = (0.6, 0.2)$ , what should we expect to observe?

☐ Convergence to  $(0.25, 0.0)$

☐ Convergence to  $(0.25, 0.5)$

☒ Convergence to  $(0.75, 0.5)$

☐ Convergence to some other point inside the unit square

☐ Convergence to some other point outside the unit square

☐ Divergence (no convergence to any point)

Submit
