Question 6

1/1 point (graded)

You are analyzing a corpus of text, and want to find the frequency of words.

You want the frequency counting process to group words with similar meanings together - for example, "teach", "teacher", and "teaching" should be counted as the same word.

Which of the following actions groups related words together?

- ☐ Removing stop words from the text corpus
- ☐ Normalizing text by removing punctuation and whitespace, and converting all characters to lower case
- ☒ Stemming the words 
- ☐ Calculating term frequency-inverse document frequency (TF-IDF)
