

OSError: [Errno 'jupyter-notebook' not found] 2

Hi I have installed "Anaconda3-4.3.1-Windows-x86_64" in my desktop but i get below error when I run the command "jupyter notebook" from CMD.

Error:

```
C:\Users\my pc>jupyter notebook
Traceback (most recent call last):
File "C:\Users\pr275959\AppData\Local\Continuum\Anaconda3\Scripts\jupyter-script.py", line
5, in <"module">
    sys.exit(jupyter_core.command.main())
File "C:\Users\pr275959\AppData\Local\Continuum\Anaconda3\lib\site-
packages\jupyter_core\command.py", line 186, in main
    _execvp(command, sys.argv[1:])

After installing anaconda, create a new environment using the following command

```
conda create -n yourenvname python=x.x anaconda
```

Then active the environment using

```
source activate yourenvname
```

Now install jupyter

```
conda install jupyter
```

Then,run jupyter-notebook
