Using the edX Platform and Getting Help

This course requires you to be comfortable with navigating the edX platform. If you are new to edX or online courses, please take the [DemoX](#) course, offered by edX. This demonstration course is free, takes about an hour to complete, and walks you through the features of edX.

[Visit the edX Help Center](#) if you need further assistance navigating or using the platform.

You can view your grades on the [Progress](#) tab.

Each week, we will have discussion forums where you can post questions about the material. The forums will be linked within each unit, or can be accessed from the [Discussion](#) tab. Our discussion environment is respectful and intolerant of cheating behaviors. Review the Honor Code Discussion Forum Guidelines in the [Syllabus](#) before posting.
