MATLAB as a calculator

▶ 2:25 / 2:25 ▸ 2.0x

so that the MATLAB expression more closely matches the mathematical formula.

Next, we enter the formula for the first root.

While this expression may appear correct at first, it doesn't produce the intended result.

Because MATLAB calculations follow the order of operations,

we actually entered this expression.

So, minus 'b' is no longer part of the fraction

and 'a' is not in the denominator.

To get the correct result, we need to add the

Using MATLAB as a calculator (External resource)

(1.0 points possible)

The value of a sinusoid at a point

Compute the value of the expression

$A\cos\left(\frac{3}{2}\pi t+\phi\right)$

for $A=2$, $t=1$, $\phi=\frac{3\pi}{5}$.

The cosine function $\cos(x)$ is called

```
cos(x)
```

.
