Quiz: Introduction to Linear

Course > 3.0 Logistic and Softmax Regression > 3.1 Logistic Regression Prediction > Classifiers and Logistic Regression

# Quiz: Introduction to Linear Classifiers and Logistic Regression Instructions for Graded Review Questions

How much time do I have to complete these questions?

Unlimited. You can take as long you want to answer these questions.

Can I go back to the videos to check something, then come back to these Review Questions?

Yes, absolutely! These questions are for you to review what you've learned so far. Take your time.

Do these Review Questions count towards my final grade?

Yes, all of the review questions, combined together, are worth 50% of your total mark.

How many chances do I get to answer these questions?

It depends:

- For True/False questions, you only get one (1) chance.
- For any other question (that is not True/False), you get two (2) chances.

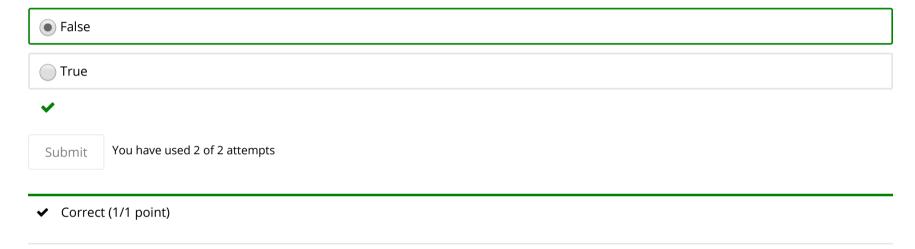

#### How can I check my overall course grade?

You can check your grades by clicking on "Progress" in the top menu.

# Multiple Choice

1/1 point (graded)

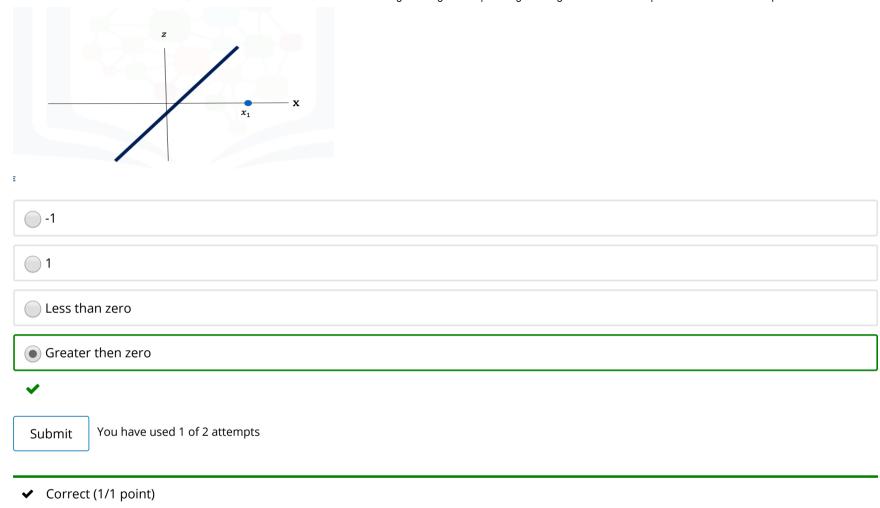

True or False? The following samples can be used for classifications for the variable y: 0,1.4, 0.11?

## **Multiple Choice**

1/1 point (graded)

Consider the line z=ax+b if the value for  $x_1$  is used as an input, what would the value of z be?

### Checkboxes

1/1 point (graded)

If the input to the sigmoid fuction is larger than zero, the output is larger then 0.5; consider the line z=ax+b if the value for  $x_1$  is used as an input. If the sigmoid fuction was applied what would it's range be?
