3.5.4 Finger Exercise: Forward versus Backward Euler $\square$ Bookmark this page  Finger Exercises 3 due Aug 17, 2023 05:00 IST completed  M02.7  Consider the differential equation $\frac{du}{dt} = -1000u$ with initial condition $u$ (0) = 1.  Problem: Forward Euler first iteration  1/1 point (graded) Find $u_{\rm FE}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power equation of the form X.YZeP wher	Previous			<b>(2)</b>	<b>Z</b>		Next
Finger Exercises 3 due Aug 17, 2023 05:00 IST Completed M02.7  Consider the differential equation $\frac{\mathrm{d} u}{\mathrm{d} t} = -1000 u$ with initial condition $u\left(0\right) = 1$ .  Problem: Forward Euler first iteration 1/1 point (graded) Find $u_{\mathrm{PE}}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power submit	•	er Exercise:	Forw	ard ve	ersus	Backv	vard
Consider the differential equation $\frac{du}{dt} = -1000u$ with initial condition $u\left(0\right) = 1$ .  Problem: Forward Euler first iteration 1/1 point (graded) Find $u_{\text{FE}}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  Answer: -9.00e0  Submit  Answers are displayed within the problem  Problem: Backward Euler first iteration 1/1 point (graded) Find $u_{\text{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date	☐ Bookmark this	page					
Consider the differential equation $\frac{du}{dt} = -1000u$ with initial condition $u\left(0\right) = 1$ .  Problem: Forward Euler first iteration 1/1 point (graded) Find $u_{\text{FE}}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  Answer: -9.00e0  Submit  Answers are displayed within the problem  Problem: Backward Euler first iteration 1/1 point (graded) Find $u_{\text{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date							
with initial condition $u\left(0\right)=1$ .  Problem: Forward Euler first iteration 1/1 point (graded) Find $u_{\mathrm{FE}}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  Answer: -9.00e0  Answer: -9.00e0  Answer: -9.00e0  Problem: Backward Euler first iteration 1/1 point (graded) Find $u_{\mathrm{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit		3 due Aug 17, 2	023 05:	00 IST	Complete	ed	
with initial condition $u\left(0\right)=1$ .  Problem: Forward Euler first iteration 1/1 point (graded) Find $u_{\text{FE}}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  Answer: -9.00e0  Answers are displayed within the problem  Problem: Backward Euler first iteration 1/1 point (graded) Find $u_{\text{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit	Consider the o	lifferential equ	ation				
with initial condition $u\left(0\right)=1$ .  Problem: Forward Euler first iteration 1/1 point (graded) Find $u_{\text{FE}}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  Answer: -9.00e0  Answers are displayed within the problem  Problem: Backward Euler first iteration 1/1 point (graded) Find $u_{\text{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit							(3.27
Problem: Forward Euler first iteration  1/1 point (graded) Find $u_{\rm FE}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  -9.00e0  Answer: -9.00e0  Submit  Problem: Backward Euler first iteration  1/1 point (graded) Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date		$rac{\mathrm{d}u}{\mathrm{d}t} = -$	1000u				(0.27
Problem: Forward Euler first iteration  1/1 point (graded) Find $u_{\rm FE}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  -9.00e0  Answer: -9.00e0  Submit  Problem: Backward Euler first iteration  1/1 point (graded) Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date	with initial con	dition $u\left( 0\right) =% \frac{1}{2}\left( 1\right) \left( 1$	. 1				
1/1 point (graded) Find $u_{\rm FE}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  -9.00e0  Answer: -9.00e0  Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded) Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2	With Initial Con		1.				
Find $u_{FE}^1$ , the value reached by one step of the Forward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  -9.00e0  Answer: -9.00e0  Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date	Problem: F	orward Eul	er firs	st iter	ation		
method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  -9.00e0  Answer: -9.00e0  Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date	1/1 point (graded	1)					
digits of precision (of the form X.YZeP where P is the base10 power -9.00e0  -9.00e0  Answer: -9.00e0  Submit  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date			by one	step o	f the F	orward E	Euler
-9.00e0  Submit  Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date		•			•		
Submit  Submit  Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  Solution: The solution will be available shortly after the due date	digits of precis	sion (of the for	m X.YZ	eP whe	re P is	the bas	e10 powe
Submit  Submit  Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{\rm BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  Solution: The solution will be available shortly after the due date	-9.00e0		$\neg$ .	∕ Answ	/er· -9 (	00e0	
Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{\mathrm{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date			`	, , , , ,			
Answers are displayed within the problem  Problem: Backward Euler first iteration  1/1 point (graded)  Find $u_{\mathrm{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date							
Problem: Backward Euler first iteration  1/1 point (graded) Find $u_{\mathrm{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date.	Submit						
Problem: Backward Euler first iteration  1/1 point (graded) Find $u_{\mathrm{BE}}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t = 0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date.							
1/1 point (graded) Find $u_{ m BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2	• Answers	are displayed v	vithin tl	ne prob	olem		
Find $u_{ m BE}^1$ , the value reached by one step of the Backward Euler method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2	Problem: B	ackward E	uler f	irst it	eratio	on	
method with time step $\Delta t=0.01$ . Provide your answer with three digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2	1/1 point (graded	1)					
digits of precision (of the form X.YZeP where P is the base10 power 9.09e-2  Submit  SOLUTION: The solution will be available shortly after the due date
