5.1.1 Composing Rotations

Please note the following observation, posted on the discussion board:

Hello,

it appears to me that at minute 3:40 of the video , matrix component a10 is indicated as $\cos(\text{rho})*\sin(\text{theta})+x*\sin(\text{rho})*\cos(\text{theta})$ while in my opinion should be $\cos(\text{rho})*\sin(\text{theta})+\sin(\text{rho})*\cos(\text{theta})$.

thanks Luca

✓ Homework 5.1.1.1: Is \$\tau\$ a variable, or \$= 2\pi\$ radians?

2

Homework 5.1.1.1

3/3 points (graded)

For the following statements, find out if they are true or false.

$$ullet \left(egin{array}{c|c} \cos\left(
ho+\sigma+ au
ight) \ \sin\left(
ho+\sigma+ au
ight) \end{array}
ight) = \left(egin{array}{c|c} \cos\left(au
ight) & -\sin\left(au
ight) \ \hline \sin\left(au
ight) & \cos\left(au
ight) \end{array}
ight) \left(egin{array}{c} \cos\left(
ho+\sigma
ight) \ \sin\left(
ho+\sigma
ight) \end{array}
ight)$$

True ✓ Answer: True

$$ullet \left(egin{array}{c} \cos \left(
ho + \sigma + au
ight) \ \sin \left(
ho + \sigma + au
ight) \end{array}
ight) = \left(egin{array}{c} \cos \left(au
ight) & -\sin \left(au
ight) \ \sin \left(au
ight) \end{array}
ight) \left(egin{array}{c} \cos \left(
ho
ight) \cos \left(\sigma
ight) - \sin \left(
ho
ight) \sin \left(\sigma
ight) \ \sin \left(
ho
ight) \cos \left(\sigma
ight) + \cos \left(
ho
ight) \sin \left(\sigma
ight) \end{array}
ight)$$

True ✓ Answer: True

$$\cos\left(\rho + \sigma + \tau\right) = \cos\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) - \sin\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma + \tau\right) = \sin\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) + \cos\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma + \tau\right) = \sin\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) + \cos\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma + \tau\right) = \sin\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) + \cos\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma + \tau\right) = \sin\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) + \cos\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma + \tau\right) = \sin\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) + \cos\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma + \tau\right) = \sin\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) + \cos\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma + \tau\right) = \sin\left(\tau\right)\left(\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) + \cos\left(\tau\right)\left(\sin\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho + \sigma\right) + \cos\left(\rho\right)\cos\left(\rho\right)\cos\left(\sigma\right) - \sin\left(\rho\right)\sin\left(\sigma\right)\right) \\ \sin\left(\rho\right)\cos\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\cos\left(\rho\right)\cos\left(\sigma\right) + \cos\left(\rho\right)\cos\left(\rho\right)\cos\left(\rho\right)\cos\left(\rho\right) \\ \sin\left(\rho\right)\cos$$

True ✓ ✓ Answer: True

Explanation

Answer: True Extending the observations in the video, we know that

$$R_{\rho+\sigma+\tau}(e_0) = R_{\tau}(R_{\rho+\sigma}(e_0)).$$

But

$$R_{\rho+\sigma+\tau}(e_0) = \begin{pmatrix} \cos(\rho+\sigma+\tau) \\ \sin(\rho+\sigma+\tau) \end{pmatrix}$$

and

$$R_{\tau}(R_{\rho+\sigma}(e_0)) = \begin{pmatrix} \cos(\tau) & -\sin(\tau) \\ \hline \sin(\tau) & \cos(\tau) \end{pmatrix} \begin{pmatrix} \cos(\rho+\sigma) \\ \sin(\rho+\sigma) \end{pmatrix}.$$

establishing the result.

$$\bullet \left(\begin{array}{c|c} \cos(\rho + \sigma + \tau) \\ \sin(\rho + \sigma + \tau) \end{array} \right) = \left(\begin{array}{c|c} \cos(\tau) & -\sin(\tau) \\ \hline \sin(\tau) & \cos(\tau) \end{array} \right) \left(\begin{array}{c|c} \cos\rho\cos\sigma - \sin\rho\sin\sigma \\ \sin\rho\cos\sigma + \cos\rho\sin\sigma. \end{array} \right)$$

True/False

Answer: True From the video we know that

$$R_{\rho+\sigma}(e_0) = \left(\begin{array}{c|c} \cos(\sigma) & -\sin(\sigma) \\ \hline \sin(\sigma) & \cos(\sigma) \end{array}\right) \left(\begin{array}{c|c} \cos(\rho) & -\sin(\rho) \\ \hline \sin(\rho) & \cos(\rho) \end{array}\right) \left(\begin{array}{c|c} 1 \\ 0 \end{array}\right) = \left(\begin{array}{c|c} \cos\rho\cos\sigma - \sin\rho\sin\sigma \\ \sin\rho\cos\sigma + \cos\rho\sin\sigma. \end{array}\right)$$

establishing the result.

$$\cos(\rho + \sigma + \tau) = \cos(\tau)(\cos\rho\cos\sigma - \sin\rho\sin\sigma) - \sin(\tau)(\sin\rho\cos\sigma + \cos\rho\sin\sigma)$$

$$\sin(\rho + \sigma + \tau) = \sin(\tau)(\cos\rho\cos\sigma - \sin\rho\sin\sigma) + \cos(\tau)(\sin\rho\cos\sigma + \cos\rho\sin\sigma)$$

True/False

Answer: True This is a matter of multiplying the last result.
