3.3.2 Adding matrices

Matrix operations for matrices that don't represent linear transformations

If I understand everything correctly, we found the definition of matrix addition by proving that if La and Lb are both linear transformations, then t...

Homework 3.3.2.7 Alternative Proof?

homework 3.3.2.12

I am confused about items 1 and 4 on homework 3.3.2.12. If A and B are lower triangle matrices that have a corresponding element of the same...

I don't understand Homework 3.3.2.10

Can you clarify why this is always true? I looked back at the past similar proofs and still don't understand.

Finding an error in the pdf materials

Hi: I find a typo in the page 105. The 3rd question of Homewoek 3.3.2.12 should be "If A and B are unit lower triangular matrices then A-B is unit I....

2

Homework 3.3.2.1

1/1 point (graded)

The sum of two linear transformations is a linear transformation. More formally: Let $L_A:\mathbb{R}^n \to \mathbb{R}^m$ and $L_B:\mathbb{R}^n \to \mathbb{R}^m$ both be linear transformations and , for all $x \in \mathbb{R}^n$, define the function $L_C:\mathbb{R}^n \to \mathbb{R}^m$ by $L_C(x) = L_A(x) + L_B(x)$. $L_C(x)$ is a linear transformation.

Always ✓ Answer: Always

Explanation

Let $x,y\in\mathbb{R}^n$ and $lpha\in\mathbb{R}$ and $L_C=L_A+L_B$. Then

$$egin{aligned} L_{C}\left(lpha x
ight) &= lpha L_{C}\left(x
ight): \ L_{C}\left(lpha x
ight) &= L_{A}\left(lpha x
ight) + L_{B}\left(lpha x
ight) = lpha L_{A}\left(x
ight) + lpha L_{B}\left(x
ight) \ &= lpha \left(L_{A}\left(x
ight) + L_{B}\left(x
ight)
ight) = lpha L_{C}\left(x
ight). \ L_{C}\left(x+y
ight) &= L_{C}\left(x
ight) + L_{C}\left(y
ight): \ L_{C}\left(x+y
ight) &= L_{A}\left(x+y
ight) + L_{B}\left(x+y
ight) \ &= L_{A}\left(x
ight) + L_{A}\left(y
ight) + L_{B}\left(y
ight) = L_{A}\left(x
ight) + L_{B}\left(y
ight) + L_{B}\left(y
ight) \ &= L_{C}\left(x
ight) + L_{C}\left(y
ight). \end{aligned}$$

Homework 3.3.2.2

1/1 point (graded)

Algorithm: $[A] := ADD_MATRICES_ALTERNATIVE(A, B)$

Partition
$$A \to \left(\begin{array}{c} A_T \\ \hline A_B \end{array}\right)$$
, $B \to \left(\begin{array}{c} B_T \\ \hline B_B \end{array}\right)$

where A_T has 0 rows, B_T has 0 rows

while $m(A_T) < m(A)$ do

Repartition

$$\left(\begin{array}{c} A_T \\ \hline A_B \end{array}\right) \rightarrow \left(\begin{array}{c} A_0 \\ \hline a_1^T \\ \hline A_2 \end{array}\right), \left(\begin{array}{c} B_T \\ \hline B_B \end{array}\right) \rightarrow \left(\begin{array}{c} B_0 \\ \hline b_1^T \\ \hline B_2 \end{array}\right)$$

where a_1 has 1 row, b_1 has 1 row

Continue with

$$\left(\begin{array}{c} A_T \\ \hline A_B \end{array}\right) \leftarrow \left(\begin{array}{c} A_0 \\ \hline a_1^T \\ \hline A_2 \end{array}\right) , \left(\begin{array}{c} B_T \\ \hline B_B \end{array}\right) \leftarrow \left(\begin{array}{c} B_0 \\ \hline b_1^T \\ \hline B_2 \end{array}\right)$$

endwhile

What update will add $oldsymbol{B}$ to $oldsymbol{A}$ one row at a time, overwriting $oldsymbol{A}$ with the result?

- $a_1 := 0$
- $a_1 := a_1 + b_1$
- $b_1 := a_1 + b_1$
- $igcap a_1^T := a_1^T + b_1^T$
- $igcup b_1^T := a_1^T + b_1^T$

[explanation]

Answer: $a_1^T := a_1^T + b_1^T$

Submit

Homework 3.3.2.3

1/1 point (graded)

Let $A,B\in\mathbb{R}^{m imes n}$. A+B=B+A.

Always Answer: Always

Explanation

Transcripted in final section of this week

Scanned solution from video

Robert's explanation

Proof 1: Let C = A + B and D = B + A. We need to show that C = D. But

$$\gamma_{i,j} = \alpha_{i,j} + \beta_{i,j} = \beta_{i,j} + \alpha_{i,j} = \delta_{i,j}.$$

Hence C = D.

Proof 2:

$$A + B = \begin{pmatrix} \alpha_{0,0} & \alpha_{0,1} & \cdots & \alpha_{0,n-1} \\ \alpha_{1,0} & \alpha_{1,1} & \cdots & \alpha_{1,n-1} \\ \vdots & \vdots & & \vdots \\ \alpha_{m-1,0} & \alpha_{m-1,1} & \cdots & \alpha_{m-1,n-1} \end{pmatrix} + \begin{pmatrix} \beta_{0,0} & \beta_{0,1} & \cdots & \beta_{0,n-1} \\ \beta_{1,0} & \beta_{1,1} & \cdots & \beta_{1,n-1} \\ \vdots & \vdots & & \vdots \\ \beta_{m-1,0} & \beta_{m-1,1} & \cdots & \beta_{m-1,n-1} \end{pmatrix}$$

$$= \begin{pmatrix} \alpha_{0,0} + \beta_{0,0} & \alpha_{0,1} + \beta_{0,1} & \cdots & \alpha_{0,n-1} + \beta_{0,n-1} \\ \alpha_{1,0} + \beta_{1,0} & \alpha_{1,1} + \beta_{1,1} & \cdots & \alpha_{1,n-1} + \beta_{1,n-1} \\ \vdots & & \vdots & & \vdots \\ \alpha_{m-1,0} + \beta_{m-1,0} & \alpha_{m-1,1} + \beta_{m-1,1} & \cdots & \alpha_{m-1,n-1} + \beta_{m-1,n-1} \end{pmatrix}$$

$$= \begin{pmatrix} \beta_{0,0} + \alpha_{0,0} & \beta_{0,1} + \alpha_{0,1} & \cdots & \beta_{0,n-1} + \alpha_{0,n-1} \\ \beta_{1,0} + \alpha_{1,0} & \beta_{1,1} + \alpha_{1,1} & \cdots & \beta_{1,n-1} + \alpha_{1,n-1} \\ \vdots & & \vdots & & \vdots \\ \beta_{m-1,0} + \alpha_{m-1,0} & \beta_{m-1,1} + \alpha_{m-1,1} & \cdots & \beta_{m-1,n-1} + \alpha_{m-1,n-1} \end{pmatrix}$$

$$= \begin{pmatrix} \beta_{0,0} & \beta_{0,1} & \cdots & \beta_{0,n-1} \\ \beta_{1,0} & \beta_{1,1} & \cdots & \beta_{1,n-1} \\ \vdots & \vdots & & \vdots \\ \beta_{m-1,0} & \beta_{m-1,1} & \cdots & \beta_{m-1,n-1} \end{pmatrix}$$

$$= \begin{pmatrix} \beta_{0,0} & \beta_{0,1} & \cdots & \beta_{0,n-1} \\ \beta_{1,0} & \beta_{1,1} & \cdots & \beta_{1,n-1} \\ \vdots & \vdots & & \vdots \\ \beta_{m-1,0} & \beta_{m-1,1} & \cdots & \beta_{m-1,n-1} \end{pmatrix}$$

$$= \begin{pmatrix} \beta_{0,0} & \beta_{0,1} & \cdots & \beta_{0,n-1} \\ \beta_{1,0} & \beta_{1,1} & \cdots & \beta_{1,n-1} \\ \vdots & \vdots & & \vdots \\ \beta_{m-1,0} & \beta_{m-1,1} & \cdots & \beta_{m-1,n-1} \end{pmatrix}$$

$$= \begin{pmatrix} \beta_{0,0} & \beta_{0,1} & \cdots & \beta_{0,n-1} \\ \beta_{1,0} & \beta_{1,1} & \cdots & \beta_{1,n-1} \\ \vdots & \vdots & & \vdots \\ \beta_{m-1,0} & \beta_{m-1,1} & \cdots & \beta_{m-1,n-1} \end{pmatrix}$$

$$= \begin{pmatrix} \beta_{0,0} & \beta_{0,1} & \cdots & \beta_{0,n-1} \\ \beta_{1,0} & \beta_{1,1} & \cdots & \beta_{1,n-1} \\ \vdots & \vdots & & \vdots \\ \beta_{m-1,0} & \beta_{m-1,1} & \cdots & \beta_{m-1,n-1} \end{pmatrix}$$

Homework 3.3.2.4

1/1 point (graded)

Let $A,B,C\in\mathbb{R}^{m imes n}$. (A+B)+C=A+(B+C)

Always 🗸 🗸 Answer: Always

Explanation

Answer: Always

Let's introduce the notation $(A)_{i,j}$ for the i,j element of A. Then

$$((A+B)+C)_{i,j} = (A+B)_{i,j} + (C)_{i,j} = ((A)_{i,j} + (B)_{i,j}) + (C)_{i,j} = (A)_{i,j} + ((B)_{i,j} + (C)_{i,j})$$
$$= (A)_{i,j} + (B+C)_{i,j} = (A+(B+C))_{i,j}.$$

Hence (A + B) + C = A + (B + C).

• Answers are displayed within the problem

Homework 3.3.2.5

1/1 point (graded)

Let $A,B\in\mathbb{R}^{m imes n}$ and $\gamma\in\mathbb{R}$. $\gamma\left(A+B
ight)=\gamma A+\gamma B$.

Always

Answer: Always

Explanation

Answer: Always

(Using the notation from the last proof.)

$$(\gamma(A+B))_{i,j} = \gamma(A+B)_{i,j} = \gamma((A)_{i,j} + (B)_{i,j}) = \gamma(A)_{i,j} + \gamma(B)_{i,j} = (\gamma A + \gamma B)_{i,j}$$

Hence, the i, j element of $\gamma(A+B)$ equals the i, j element of $\gamma A + \gamma B$, establishing the desired result.

Homework 3.3.2.6

1/1 point (graded)

Let $A,B\in\mathbb{R}^{m imes n}$ and $eta,\gamma\in\mathbb{R}$. $(eta+\gamma)\,A=eta A+\gamma A.$

Always ~

Answer: Always

Explanation

Answer: Always

(Using the notation from the last proof.)

$$((\beta + \gamma)A)_{i,j} = (\beta + \gamma)(A)_{i,j} = \beta(A)_{i,j} + \gamma(A)_{i,j} = (\beta A)_{i,j} + (\gamma A)_{i,j}.$$

Hence, the i, j element of $(\beta + \gamma)A$ equals the i, j element of $\beta A + \gamma A$, establishing the desired result.
