7. Written Report: Submission and Peer Review

🔖 Bookmark this page

Analysis due Oct 27, 2021 17:29 IST   Completed

The report submission and peer review tool will be released after the Part A due date. The weight of the written report/peer review component will appear on the progress chart only after this tool has been released.

DUE DATE: Please ignore the due date above, which is only the due date for the autograded problems in this homework. The due dates for the written report/peer review component are independent of the platform and are:

- **Written Report Submission due Wednesday November 3 11:59am UTC**

- **Peer Grading and Comments due Wednesday November 10 11:59am UTC**

- **Selection of Valuable Comments due Wednesday November 17 11:59am UTC**

Weighting (Updated October 20:

The written report, and peer review will be worth **60 points** (out of 87) of this homework:

- Autograded Part: 27 pts

- Written Report/Peer Review: 60 pts

  - Written Report (42 pts)

  - Peer Review: Grading and Comments (12 pts)

  - Most Valuable Comments (6 pts)

Peer Review Guidelines

- Try your best to understand your peer's report. Many of us have English as a second language.

- **Grade each part of a problem out of the points possible.** This weight is listed with the question.

- Refer to the rubric for guidance on the points to give for each part of the question. **For each part, you need to justify all points that you take off based on the rubric.** Please select the relevant text in the submission you are grading, and writing in a comment the number of points removed and why (e.g. -1 because ... Suggestion: ...)

- **Give constructive feedback and suggestions. Share what your peers can learn from you.**

- At the end of the submission, make a comment to **show the total score** for the submission. Renormalize to get a score out of 10 and enter that score in the grade slider for that report.

- If the written response does not fit well with the rubric, try to see what is the concept being tested and evaluate whether the response demonstrates understanding of that concept. We ask that you **err on the side of being lenient** when making such decisions.

In asking you to explain all points that you deduct, we are simply attempting to safeguard against unjustified points being taken off. We still strongly encourage you to focus on **sharing constructive feedback and suggestions** .

Weighting: The completion of grading and making at least 3 comments for each report (total of 9) will be worth 20% of the written report/peer review component of this homework.

Selection of Most Valuable Comments

You will need to select 3 most valuable comments that are made to your submission. (Toggle to "Show only things that I contributed to" to filter to comments on your submission.)

Weighting: Being selected as the most valuable comments is worth 10% of the written report/peer review

Weighting. Being selected as the most valuable comments is worth 10% of the written report/peer review component of this homework. If your comment is selected once by any peer, you will receive half of the points; if your comments are selected twice, you will receive all of the points.

Homework 3 Networks Written Report and Peer Review (External resource)

(55.800000000000004 / 60.0 points)
