Prof Uhler: OK, so welcome back to the second lecture

in this network's module.

So, in the first lecture, we already

discussed the different examples of networks, motivation

Apropos Motivation - Study Group
discussion posted 3 months ago by **kozaronek**

In the past I've been working on the MITx courses with a study group.

At the moment I'm not interacting with a peer group that focuses on the this course material.

Are there any groups out there that meet on a regular weekly basis?

Please contact me under **kozaronek@gmail.com** in case you belong to such a group. I'm a very disciplined learner who likes to dig deep and understand ideas thoroughly.

Also, feel free to shoot me an email if you don't belong to any group yet but would like to participate in weekly discussions.

This post is visible to everyone.

you can join the discord group: https://discord.gg/qcZ5cmKp

That's not really of interest to me. I want to be part of regular meetings where people talk through ideas.

I think that asynchronous communication in the form of a discord chat room with 2000 anonymous people is not

the bet way to learn these materials. It's rather distracting and noisy.

Hi kozaronek,

I'll be interested in joining myself if the times fit. Once/week would be good.

I'll send you a quick email.

Hello. I hope I'm not late to the party. Please include me in the meeting as well. Here's my email: jasperescuro88@gmail.com

Hi Kozaronek, is your study group started yet? I would like to be part of it.

Can you send an email to him? We've only begun the 1st session. kozaronek@gmail.com
