edX   **Microsoft: DAT203x Data Science and Machine Learning Essentials**

QUESTION 7 (1 point possible)

You discover that there are missing values for an unordered numeric column in your data.

Which three approaches can you consider using to treat the missing values?

☐   Substitute the text "None".

☑   Forward fill or back fill the value.

☑   Remove rows in which the value is missing.

☐   Interpolate a value to replace the missing value.

☑   Substitute the numeral 0

✖

Note: Make sure you select all of the correct options—there may be more than one!
