What is MATLAB?

Robotics, Machine Learning, Image Processing, and Biology, just to name a few.

But MATLAB is not used just by students, Engineers and scientists are using MATLAB to

Develop automated driving systems, making our roads safer.

Create new medical devices to improve care for millions of people.

Change the way we live through robotics.

And explore the mysteries of the solar system.

So let's get started!

By using MATLAB you'll gain valuable job skills,

Getting MATLAB

As a result of support from MathWorks, a license to MATLAB Online for the duration of this course is available. MATLAB Online gives you access to MATLAB directly from your browser on a computer with internet access. To get started using MATLAB Online:

1. If you do not already have a MathWorks account, create one at the [Mathworks registration page](#). Be sure to verify your email (check your Junk/Spam folders) before moving on to step 2.
2. Set up your [MathWorks account](#) with MATLAB Online access.
3. After using the link in step 2 to login in MATLAB Online for the first time, bookmark [MATLAB Online](#) for ease of use during the course.

MATLAB Online is supported in Chrome, Firefox, and Safari.

In addition to having access to MATLAB Online, many problems that you solve will be using MATLAB directly from within MITx Online. Before we start learning the basics of MATLAB, go ahead and watch this short video that will orient you on using MATLAB within the MITx Online platform.

Note: Members of the MathWorks staff will be monitoring the discussion forums to help with technical issues you may have, so please direct your questions there as the MOOC license is ineligible for technical support directly from MathWorks.

Using MATLAB inside of MITx

Timely feedback is often the difference between a valuable learning experience, or, a lesson in patience.

And that's definitely true when programming.

In this course, you'll be using embedded MATLAB programming exercises which provide both instant

assessment, and helpful feedback if your solution's not quite right.

This way, you can learn from and fix your mistakes, without waiting for someone else
