3. The making of this course

 [Bookmark this page](#)

This course was created using latex2edX, a free tool developed at MIT for creating content for MITx written in LaTeX. LaTeX is a typesetting language that is fantastic for writing math! Occasionally, the equations you see in the webpage (which are rendered in mathjax) do not load appropriately. Our apologies. The easiest fix is to simply reload the page. Another solution is to change browsers. Firefox seems to render mathjax less reliably than Chrome or Safari.

Tablet Devices: Users report that most of the problems can be done on a tablet device. However, if you find that unusual errors are creeping in (especially with formula input type problems or interactive mathlets) we recommend switching to a laptop or desktop computer for a better user experience.
