4. How to Succeed

 [Bookmark this page](#)

Prerequisites

This course has a global audience with students from a wide variety of backgrounds. To succeed in this course, you must have a solid foundation in

- scalar differential equations (18.031 Introduction to Differential Equations)
- 2x2 systems of differential equations (18.032x Differential Equations: 2x2 Systems)

We know that many students may already have a solid foundation in differential equations. Part of what makes this online course successful is your interactions with people from a variety of backgrounds!

Reference materials

The material we provide in the Courseware contains all of the content you need for this course. We created this content for our students at MIT precisely because there was no one text that taught our students what we wanted them to learn.

Links to other web resources can be found on the Home page under the header “Related Links”. Feel free to share other resources on the discussion forum.
