This course was developed at MIT and is made available to you by the nonprofit MITx Online, which uses the Open edX platform. The Open edX platform is an open source platform for learning! It allows people from around the world to access content for free, based on their own interests and background.

If you have never taken a course on MITx, please take the time to review the following pages to familiarize yourself with the platform and its capabilities.

In this course, we have the following top-level resources:

- **Course** Under this tab, you will find the graded content of this course, as well as all learning materials.
- **Progress** Under this tab, you will find a progress chart that will show you how you are progressing through the content.
- **Dates** Under this tab, you will find relevant dates such as due dates and verification upgrade deadlines in your local timezone.
- **MATLAB Online** Under this tab, you will find a link to MATLAB Online and a special license to you as a course participant to use for your MITx Online Course. This is a limited license for the duration of your course. (See more in the Intro to MATLAB section.)
- **Discussion** Under this tab, you will find a link to the full discussion forum. For specific discussions related to a problem or video, use the link to the discussion forum found at the bottom of each page.

Course is where you will spend most of your time. This is where we put the content and assessments for your learning. Everything else is a resource to support your learning.
