Voxels & Bit-Depth

4/4 points (graded)

From File > Open Samples > , open the "Organ Of Corti"

Please answer questions below.

What is the voxel size ? (in nanometer)

315

315

The image is open in Fiji as a 16 bit. What is the actual range of the image ?

The image is open in Fiji as a 16-bit. What is the actual range of the image ?

☐ 10-bit

☒ 12-bit

☐ 14-bit

☐ 16-bit

Considering this image was the first time-point of the experiment, and that we acquire 30 more time-points.

What would be the total number of images in the hyperstack ?

☐ 930

☐ 1800

☒ 1860

☐ 3720

What would be the approximate size (in MB) of the resulting time-lapse hyperstack ?

☐ 5 MB

☐ 50 MB

☒ 500 MB

☐ 5 GB

Submit

✓ Correct (4/4 points)

Further Bit-Depth

2.0/2.0 points (graded)

Which image type(s) can store floating numbers?

Select all that apply

☐ 8-bits

☐ 16-bits

☒ 32-bits

☐ RGB

☒ Composite images
