Image Calculation

0 points possible (ungraded)

Suppose you have two images X and Y as follows

Which of the following images is the result of $X - Y$?

A

B

C

D

- ☐ Image A
- ☐ Image B
- ☒ Image C ✓
- ☐ Image D

Image Calculation II

0 points possible (ungraded)

If we now want to calculate $X + Y$, and force the result to be 32-bit. What would be the outcome of the calculation?

✓ Answer: D

What should be the max value of the lookup table for the image you selected above (previously, white = 255)?

✓ Answer: 510

Valid Image Math

0 points possible (ungraded)

You have a several stacks of images that have the following metadata

 Image 1 (200%) 1 28x1 28 pixels; 8-bit; 1 6K	—	☐	×
 Image 2 (200%) 1/3; 1 28x1 28 pixels; 8-bit; 48K	—	☐	×
 Image 3 256x256 pixels; 8-bit; 64K	—	☐	×
 Image 4 (200%) c:1/3 z:1/7; 1 28x1 28 pixels; 8-bit; 336K	—	☐	×
 Image 5 (200%) 1/3; 1 28x1 28 pixels; 8-bit; 48K	—	☐	×

What Image to Image calculations are valid in Fiji?

Check all that apply

- ☐ Image 1 divided by Image 2
- ☒ Image 2 divided by Image 1 ✓
- ☐ Image 4 minus Image 5
- ☐ Image 3 multiplied by Image 5
- ☒ Image 4 plus Image 1 ✓
