Counting Beads

4/4 points (graded)

Please, [download the beads images](#) and open the image "heterogeneous_beads.tif" in Fiji

In the image "heterogeneous_beads.tif", how many beads can you visually count ?

6

✓ Answer: 6

6

To detect and count the individual beads, a satisfying method is :

☐ Autothresholding using "Default"☒ Macro "DifferenceOfGaussian.ijm" , sigma1 = 2 ✓☐ k means with 2 clusters

☒ Process > Find Maxima > Noise tolerance=100 ✓

☐ None of the mentioned above

Analyse Particles

2/2 points (graded)

Which of the following statements are true?

Check all that apply

☐ You do not need to re-run Analyze Particles after you change the result columns using Set Measurements

☒ You can get a nice visualization of the detected objects by selecting 'Show: Count Masks' followed by an appropriate lookup table ✓

☐ There is no column available that measures the perimeter of the objects

☒ You can copy-paste the results from Analyse particles to other softwares ✓
