6.5.2. Weekly Graded Assessment

Regions of Interest

3/3 points (graded)

Which of the following statements are True?

Check all that apply

- ☒ Saving an image with an ROI in TIFF format from Fiji also saves the ROI.
- ☒ One way to have multiple ROIs in Fiji is using the ROI Manager.
- ☒ You can rename ROIs from the ROI Manager.
- ☒ A single ROI can be copied from one open image to another by using "Edit > Selection > Restore Selection".

✓ Correct (3/3 points)

Analyse Particles And Results

2.0/2.0 points (graded)

You can run Analyse Particles on

Check all that apply

- ☒ an image that has an active threshold.
- ☐ a binary image

☒ a binary image stack☐ a binary image converted to 32-bit

Results Tables

3.0/3.0 points (graded)

Copy and run the following code

```
run("Close All");

minArea = 10; // in pixels 2

run("Blobs (25K)");
setAutoThreshold("Default");

run("Analyze Particles...", "size="+minArea+"-Infinity clear display exclude");
```

How many particles does the macro detect?

44

44

If we change the 'minArea' variable so as to keep only areas above 500 px², how many particles does the macro find now?

15

15

What is the mean area of these remaining particles? (Try Results > Distribution)

629.8

629.8

Batch Processing

2.0/2.0 points (graded)

Please check all statements that are TRUE

Check all that apply

- ☐ When batch processing many images, it is not important to record the image name in the results table.
- ☒ You can process results tables in Fiji, but it's recommended to analyze them using a dedicated statistics software.
- ☐ It is acceptable to batch process data acquired differently (different objectives, different number of channels, ...).
- ☒ One should avoid using 'clear results' in the Particle Analysis command during a batch, as results from the previous images will be deleted.
