

Working with ROIs

Image Processing & Analysis for Life Scientists

Olivier Burri, Romain Guiet & Arne Seitz

Working with ROIs

1. Open *Leaf (36 k)*
File→Open Samples→Leaf (36 k)
2. Convert the image to 8-bit.
3. Crop the image.
Only the leaf shall be visible afterwards.

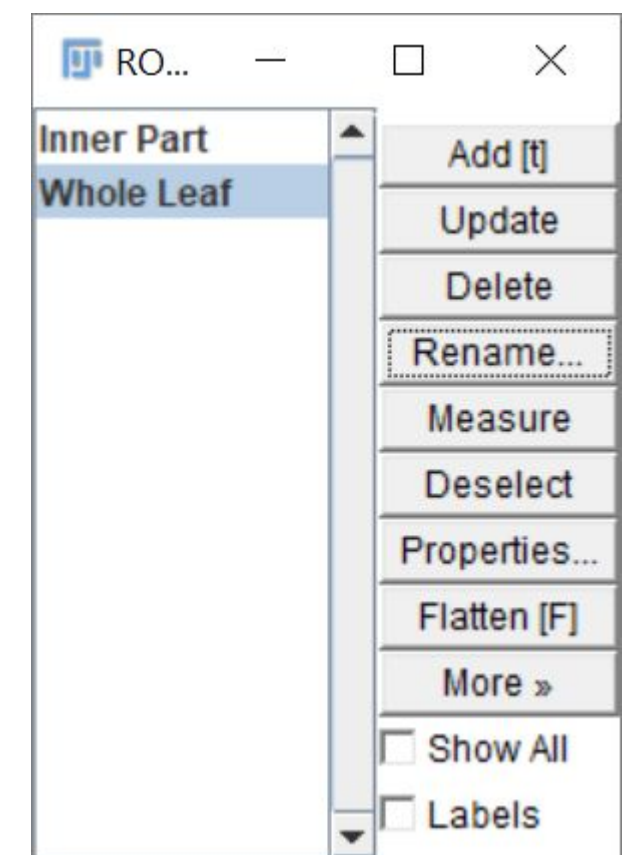

Working with ROIs

1. Open *Leaf (36 k)*
File→Open Samples→Leaf (36 k)
2. Convert the image to 8-bit.
3. Crop the image.
Only the leaf shall be visible afterwards.
4. Find an Automatic Threshold that defines the inner part of the leaf
5. Create a Selection :
Edit -> Selection -> Create Slection
6. Add it to the manager and rename it “Inner Part”

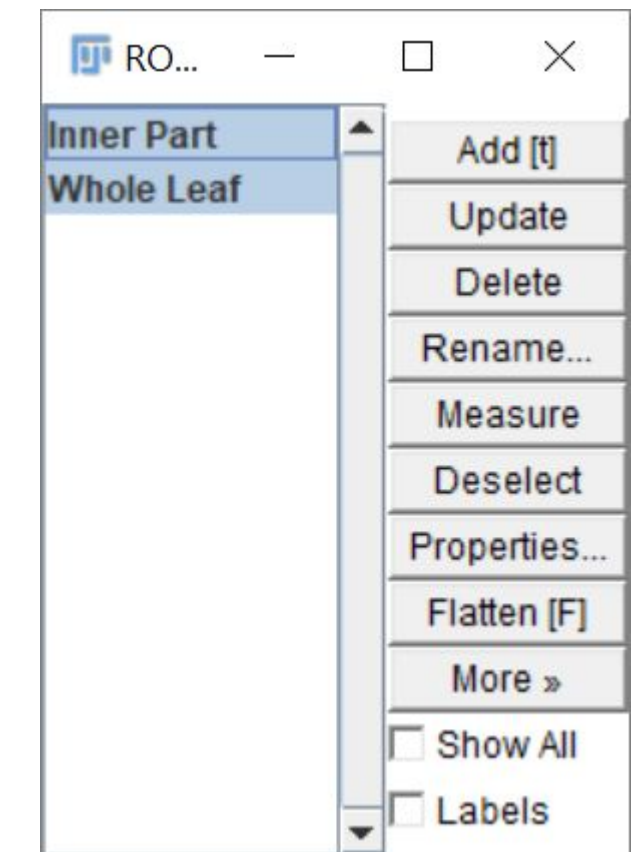

Working with ROIs

1. Open *Leaf (36 k)*
File→Open Samples→Leaf (36 k)
2. Convert the image to 8-bit.
3. Crop the image.
Only the leaf shall be visible afterwards.
4. Find an Automatic Threshold that defines the inner part of the leaf
5. Create a Selection :
Edit -> Selection -> Create Slection
6. Add it to the manager and rename it “Inner Part”
7. Repeat 4-5-6, but to define “Whole Leaf”

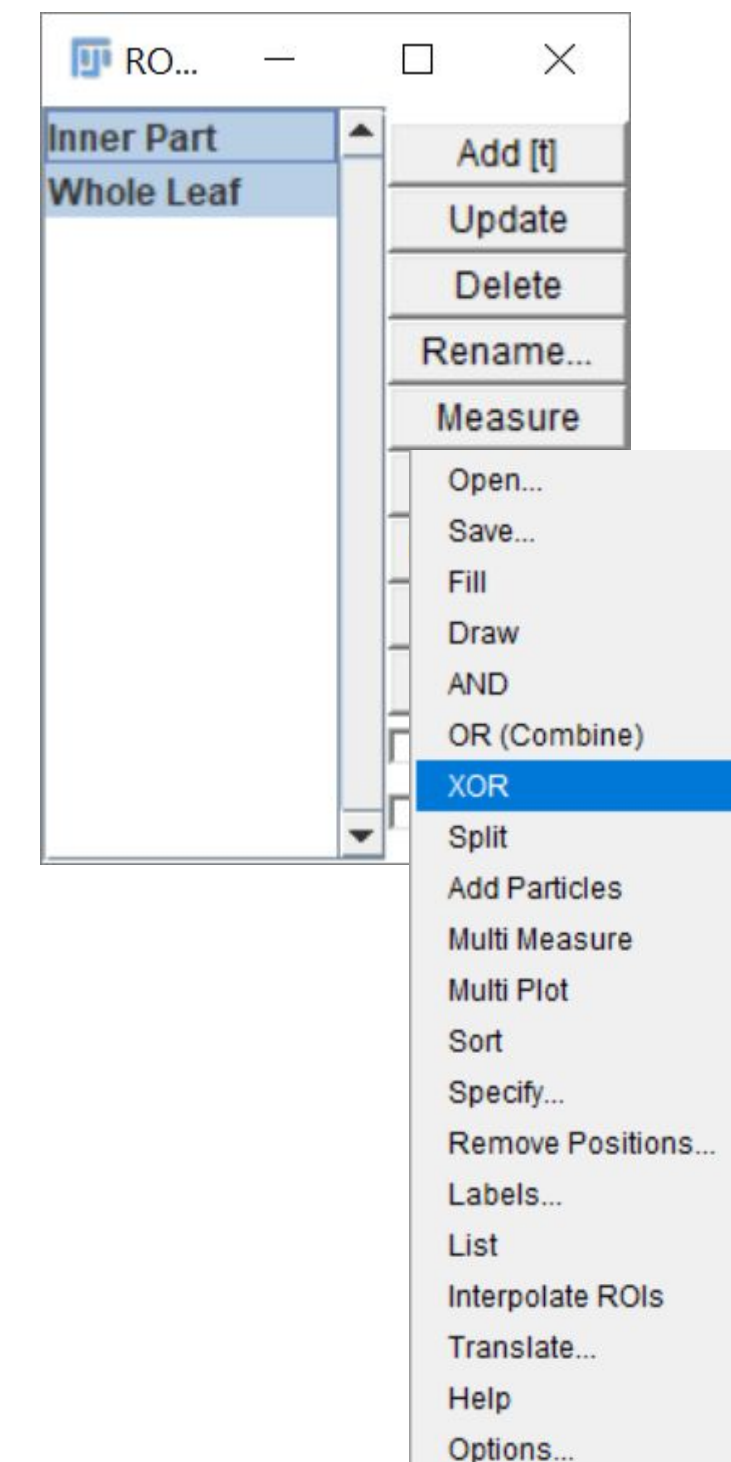

Working with ROIs

8. Select both ROIs in the ROI manager
Click on “More>>”

Working with ROIs

8. Select both ROIs in the ROI manager
Click on “More>>”
9. And select the operation “XOR”
10. Add the newly created ROI to the manager
and rename it “XOR”

Working with ROIs

8. Select both ROIs in the ROI manager
Click on “More>>”
9. And select the Operation “XOR”
10. Add the newly created ROI to the manager
and rename it “XOR”
11. Select the ROI “XOR” and click
“Properties”
12. Change “Fill Color” to yellow and press OK
