Question 9

1.0/1.0 point (graded)

Consider the connected graph $G(m,n)$ with m the number of nodes and n the number of arcs. What statement is FALSE?

- ☐ Solution 1: The number of arcs in Bellman’s subnetwork is always $m - 1$.
- ☒ Solution 2: Bellman’s subnetwork is always a tree.
- ☐ Solution 3: If the graph $G(m, n)$ contains a negative cost cycle then there is no Bellman’s subnetwork.
- ☐ Solution 4: The shortest path algorithm terminates after a finite number of iterations.
