

Course discussion

 Bookmark this page

Course discussions give you the opportunity to start conversations with other students, ask questions that other students or the course team can answer, and participate in the course community.

Note that the instructor is **not** notified when you post a message on the edX webpage. You may prefer to post your questions at the following URL:

<https://groups.google.com/g/optimization-principles-and-algorithm>

Code of conduct

Be respectful! Debate in a polite and respectful manner.

Be constructive! When commenting on other's projects, try to offer constructive feedback and suggestions that help them improve it.

Be sensitive! Especially when discussing race, religion, gender, sexual orientation, or controversial topics. Others may be more sensitive about them than you are.

Post appropriately! You may not post inappropriate (eg. pornographic) or copyrighted content, advertise or promote outside products or organizations, or spam the forums with repeat content.

Other guidelines

Read before posting! Your comment or question should build on what's already been discussed. If you have a question, scan through to see if it's already been addressed and use the search function to avoid creating duplicate threads and find the most appropriate topic thread to post in.

Use informative titles! Keep your post titles short and on-topic so the forums are easier to navigate.

Make it easy to read! Present facts and background in your post. Don't capitalize or bold entire sentences. Check your posts for spelling or grammatical errors.

Help keep this course friendly. If you think a project or comment is mean, insulting, too violent, or otherwise inappropriate, click "Report" to let us know about it.
