

Network representations

Michel Bierlaire

Practice quiz

Consider the following network:

1. What is the adjacency matrix of this network?
2. How would you represent the flows on the arcs?
3. What are the adjacency lists for the nodes of this network?
4. The adjacency list presented in the video allows to easily access the successors of each node. Propose an adjacency list, based on the same concept, that would allow an easy access to the predecessors of each node.
