condition number of any,
of course it's the condition of the relative to the 2-norm now, and that then puts a bound on the relative error in $\hat{x}$, that comes out of this. Now notice that that's--- Now, wait a second, that's not matrix A here. That is now matrix B.
Okay? And again, error in y may be partially due to a propagation of the error in b after you multiply by A Hermitian transpose and in part

Homework 4.2.5.1

1/1 point (graded)

Show that $\kappa_2\left(A^H A\right)=\left(\kappa_2\left(A\right)\right)^2$.

☒ done

Solution:

For a complete solution, see [the notes](#).
