🗨

what
machine learning Actually
does,
if you are curious about what
artificial intelligence can
or cannot achieve,
if you wish to know what the
notion
of information really means,
not only in computer science
but also
in daily life,
**join us and enrol in this
course.**

Introduction to the course

🗨

and how crucial notions such
as
subjective information and
relevance
are naturally defined in terms
of algorithmic information.
Thank you for embarking
on this intellectual journey
with us.
At the end of it,
you will be amazed at the
explanatory
power of algorithmic
information,
and hopefully you will come
to enjoy
this area of study as much

Welcome!

Welcome to this course on **Algorithmic Information**. We hope you will enjoy it.

It includes:

- videos,
- short texts,
- slideshows,
- small dialogs
- and exercises.

Most exercises are meant to help you to understand and to think about the new notions presented in the course. They are **ungraded**.
There are a few graded exercises at the end of each of the five chapters. They are used to evaluate your performance in this course.

We did our best to make this course interesting. If you follow it to the end, it will bring you a deeper understanding of **artificial intelligence**. and hopefullv much more.

Acknowledgments

This course was initially taught at [Telecom Paris](#), a French "Grande Ecole", now part of [Institut Polytechnique de Paris](#) (and also the [birthplace](#) of the word "Telecommunication" some 120 years ago). It has been significantly improved and augmented to become [a MOOC on the EdX platform](#). This upgrade into a MOOC was made possible under the lead of [Institut Mines-Telecom](#), thanks to a grant of the [Patrick and Lina Drahi Foundation](#).
